

HEALINGS AT THE DHF NATIONAL CONFERENCE

The DHF National Conference this year was blessed by a number of divine healings. As we prepare the e-connection, we have been able to follow up on four of them, and all have been permanent and complete.

Jim Gladney, pastor of Putnam City Christian Church in Oklahoma City, Oklahoma had the most dramatic touch from God. In the middle of a workshop on healing, he suddenly cut into the discussion saying "You need to know something is happening here."

Jim announced that he was hearing out of his right ear for the first time in 24 years. A fireworks accident had destroyed his right eardrum and he had been given no hope for recovery. He was sitting with his right ear toward an open window, and began hearing birds and traffic noise. After confirming to himself that he was indeed hearing in stereo, he shared the news with the workshop, and later with the whole conference. After returning home, two physicians examined him and confirmed that it was medically impossible for him to hear out of that ear, but an audiologist's tests established that he could hear anyway.

Jim's healing set off a series of other healings. Those we have confirmed recently are:

-Dee-Ann Enslin, who led worship for the conference, was healed from years of intense sciatic pain caused by degenerative disk disease. She reported freedom from pain that had haunted her for years. A few days ago, she confirmed, "I'm still pain free!! I've been able to do all sorts of things that I couldn't for years, like pick up my daughter, kneel down beside the tub and wash kid's hair, vacuum (OK, the last one I'm not all that happy about). Anyway, it's a new miracle every day that I wake up without pain. Hallelujah!!!!"

-Gary Rice, husband of DHF's clerical worker, was healed of chronic hip pain. He had been struggling with the pain since 1992, and was instantly set free at the conference. He is still pain free and eager to share his story with anyone who will listen.

-Dianne Philip went forward for prayer at the conference. She had been struggling with significant pain in her left side. She came to pray for a family member, and got a healing touch herself in the process. "Since going forward at the DHF conference to ask for prayer for a

family member, the back pain on my left side has not returned. Praise God!"

Other healings that we have not followed up on at this time include the removal of scar tissue in an eye, healing of shoulder pain, and healing of chest pain.

These healings happened in an atmosphere of unity, faith and prayer. There were no stage shows and no hype. We just bathed in the presence of God and the prayers of His people and He did the rest.
